

RECENT PROJECT SHOWCASE

Mohammad Rehan | Frontend & Software Development

Alif Galleria | Product & Business Website

JavaScript ES modules, HTML5, CSS3, Bootstrap

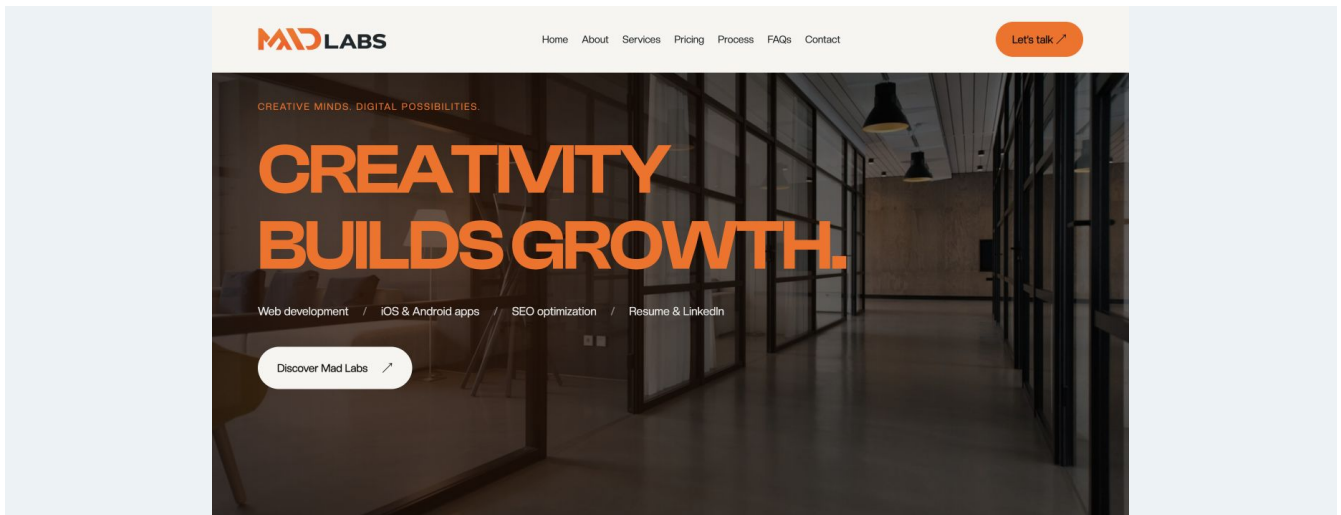

Built a componentized product website with category filters, a media gallery/lightbox, responsive navigation and product-specific WhatsApp enquiries. Generated crawlable HTML and added metadata, business structured data, robots.txt and sitemap.xml.

Mad Labs | Creative Services Website

JavaScript, HTML5, CSS3, GSAP, ScrollTrigger

Adapted a supplied design template into modular service and pricing sections, with category switching, FAQ accordions and WhatsApp enquiry links. Implemented animated reveals, responsive navigation and reduced-motion support.

RECENT PROJECT SHOWCASE

Mohammad Rehan | Frontend & Software Development

Migrato Global | Bilingual Services Website

React, TypeScript, TanStack Start, Tailwind CSS

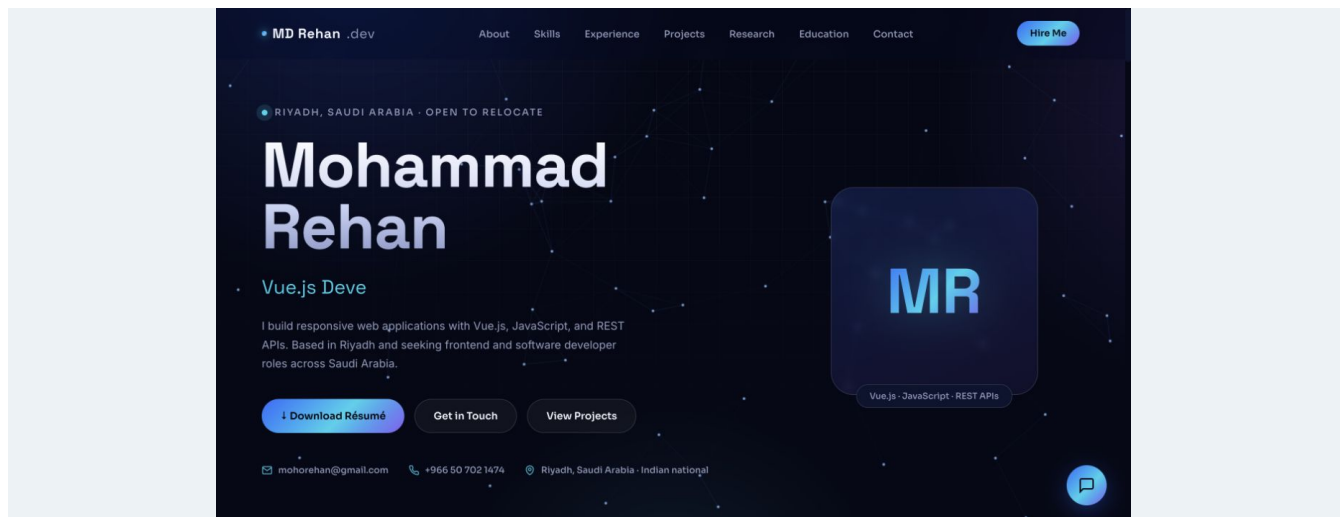

Created a Lovable-assisted React/TypeScript website with reusable service, destination and job-listing components and English/Arabic RTL support. Implemented an enquiry form with loading, success and error states, plus routed pages and structured metadata.

Developer Portfolio | Project & Research Showcase

React, JavaScript, CSS3, Vite, Vercel

Built a component-based portfolio with project case-study modals, experience sections and an interactive hero. Configured canonical/social metadata and Git-connected Vercel deployments.
