Jeddah (Ready to Relocate) | Iqama ID: 2623780554 (Transferable) | Nationality: Indian

## Profile

Motivated MCA graduate with professional experience as a Frontend Developer and strong expertise in deep learning, computer vision, and AI-driven systems. Proven track record of published and accepted research papers, patented innovations, and real-world application development. Experienced in Vue.js-based frontend development, GAN-based image synthesis, and deployment of intelligent systems using Flask and Gradio.

## Education

|                                                                                            |                                  |
|--------------------------------------------------------------------------------------------|----------------------------------|

## Projects

### Enhanced Text-to-Image Flower Generator (DCGAN & BigGAN)

*Deep Learning Project*

- Developed an advanced text-to-image synthesis system generating high-resolution flower images from textual input.
- Trained DCGAN on 5 flower categories achieving 89.2% accuracy and BigGAN on 10 categories achieving 94.0% accuracy.
- Improved image realism through customized loss functions, hyperparameter tuning, and training optimization techniques.
- Built a Flask-based web interface integrated with Gradio and Bootstrap for interactive model selection and inference.

### Text-to-Image (Flower) GAN

*Deep Learning Project*

- Designed and implemented a basic Generative Adversarial Network (GAN) to generate flower images from textual input.
- Experimented with loss functions, batch normalization, and learning rate tuning to improve training stability.
- Preprocessed and categorized flower datasets to enhance class-wise image generation performance.
- Served as the foundational project later extended to DCGAN and BigGAN architectures.

### Wellness Center E-Commerce Web Application

*Web Development Project*

- Developed a PHP-MySQL based e-commerce web application for a wellness center specializing in herbal products.
- Implemented product listings, shopping cart, secure user authentication, and order management features.
- Added a subscription system for consultation services enabling personalized wellness session tracking.

## Technical Skills

---

**Languages:** JavaScript, Python, PHP, HTML, CSS

**Frameworks & Libraries:** Vue.js, Flask, Bootstrap

**AI / ML:** PyTorch, Generative Adversarial Networks (GANs), DCGAN, BigGAN

**Databases:** MySQL, SQL, DBMS

**Tools & Platforms:** Gradio, GitHub, Oracle Cloud Infrastructure (OCI), AWS (Architecture Concepts)

## Research Papers

---

- **Gradio-Enabled Dual-Model Waste Classifier: From Scratch CNN vs MobileNetV2 for Smart Segregation** — *Accepted for publication at the 6th International Conference on Intelligent Systems and Machine Learning (ICISML 2026).*
- **Text-to-Image GAN for Realistic Flower Image Synthesis Using Textual Input** — *Published in IEEE Xplore (IDCIoT 2025).*
- **Text-Guided Floral Image Synthesis Using BigGAN: A Comparative Evaluation with DCGAN** — *Under Review at IEEE.*

## Patents

---

- **Text to Flower Image Generation System** — Indian Patent Application No. 202541004974 A, Filed: 22/01/2025, Published: 31/01/2025.
- **Flower Image Generation System and Method Thereof** — Indian Patent Application No. 202541070082 A, Filed: 23/07/2025, Published: 01/08/2025.

## Certifications

---

- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** — Oracle University, Oct 2025.
- **AWS Solutions Architecture Job Simulation** — Forage, July 2025.
- **Cybersecurity for Everyone.**
- **Microsoft Copilot for Productivity** — Microsoft & LinkedIn.

## Technical Activities

---

- Volunteered for Quiz Competition during Inter-College MCA Fest.
- Participated in multiple IT and non-IT inter-college competitions.

## Extra Curricular & Hobbies

---

Trading (Crypto, Forex, Stocks), Gaming, Travelling
